Power Tools Power Permission Form

The MHS Robotics club FIRST Team 3147 constantly works with power tools to design and build our robot each year. Each student is trained on the tools and is constantly supervised by mentors while using the tools. All students will be tested on the safety features of each tool as well as common safety regulations of FIRST. Some of tools students will be trained on and work with throughout the year would be the horizontal band saw, miter saw, vertical band saw, angle grinders, rotary tools, soldering iron, table saw, drill press, cordless driver/drill, belt sanders, and possibly new tools as the found necessary by the yearly game design. **It is the responsibility of the student to apply safety eye glasses before the tool training and at all times when in the shop environment. It is the responsibility of the student to be aware of their surroundings and practice safe procedures in the workshop around the power tools and other students using power tools.**

If you have any questions about the use of any tools, please contact us through email or by phone.

Please complete the following form which will allow your child to work in the workshop for the robotics club. If you would prefer your student not work with these tools, the student will not be allowed to come to the robotics workshop during our six week duration build season. This is for safety reasons and is not meant to exclude any person(s).

Thank you,

Mark Knight
